

Back/Forward	Navigate back or forward to display previous views of files or folders.
Title Bar	Displays the name of the currently active feature or application program. (In the example above, the name of the current folder appears in the Address Bar).
Menu Bar	Displays the names of pull-down menus which contain commands to perform specific tasks. By default the menu bar is not displayed, but you can set it to display all the time using the Organize menu options; or press (Alt) or (F10) to temporarily display the menu bar.
Command Bar	Provides commands you can use to organize and view your data.
Address Bar	Shows the current folder and makes moving to other locations quick and easy. Click the name of any folder visible in the trail to go to that folder, or click the arrow at the right end of the Address Bar to open a list of previous locations.
Search Box	Type the name of a file or folder you want to find.
Control Buttons	<p>Change the way currently open windows are displayed, as follows:</p> <p> (Minimize) Temporarily closes the window, replacing it as a button on the taskbar. Click the button on the taskbar to open or restore the window.</p> <p> (Maximize) Displays the window full screen.</p> <p> (Restore Down) Restores the window to the size it was before it was maximized.</p> <p> (Close) Closes the window. (If you see a box that only displays a  (Close) or  (Help) button, you are viewing a feature window, with a message about what you must do before moving on to anything else.)</p>
Favorite Links	Displays links to folders or locations you use often. Click a link to go directly to a location.
Navigation Pane	Displays folders and drives that you can view. This pane is commonly called the Folders list. In the Navigation pane, you can expand or collapse folders using the  or  arrows at the left of the item.
Contents Pane	Displays the contents of the folder or drive selected in the Navigation pane.
Details Pane	Displays properties or details about the file or folder currently selected in the Contents pane.
