HAMMOCKS

Thousands of years ago, the Mayans used the bark from hamack trees to make a special kind of bed. These beds were hammocks. People used them to sit on or to sleep in. They were light and easy to carry. The Mayans often moved from place to place, and they didn't want to carry heavy things.

The Mayans lived in rainforests. The weather was hot and there were lots of bugs, so it was difficult to sleep. Hammocks were perfect beds for the Mayans, because they weren't on the ground.

At first, only people in hot countries had hammocks, but then a man called Christopher Columbus took hammocks to Europe. Soon, sailors on ships started to sleep in hammocks, because they were soft and comfortable.
