

Science Agenda

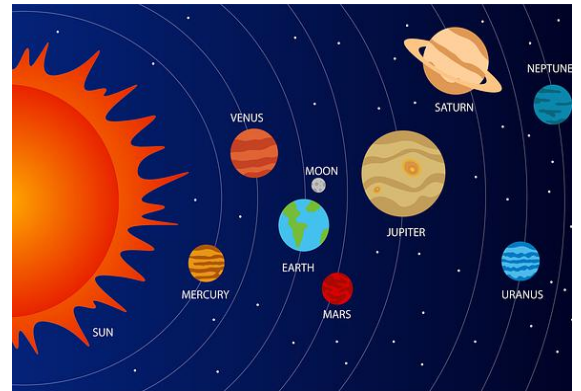

Today we:

Studied the solar system.

Learned some facts about the eight planets.

Studied Earth's movements.

Studied night and day on Earth.

Key Vocabulary:

solar system planets Sun Earth Moon

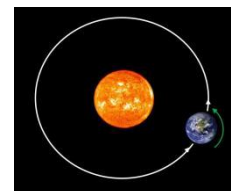

spin / rotate

orbit

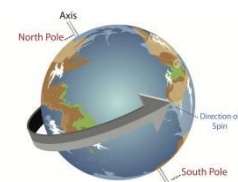

night and day

Important information.

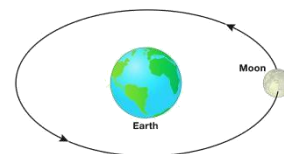

Earth **orbits** the Sun once every $365\frac{1}{4}$ days.

Earth **spins / rotates** one time every 24 hours.

The Moon **orbits** the Earth once every 28 days.

We get **night and day** because the Earth rotates.
